

ABSTRACT

User communication apparatus 110 in packet communication system 100 has internal network 111, base station apparatus 112, internal server 113, radio network 5 control apparatus 114 and mobile communication terminal apparatus 151. Radio network control apparatus 114 receives an IP packet from mobile communication terminal apparatus 115 via base station apparatus 112 and internal network 111, and directly transfers the IP packet to 10 internal server 113 via internal network 111.
